This guide was created following the third edition of *The ACS Style Guide: Effective Communication of Scientific Information* (2006).

**Citing in-text**

Although ACS style allows for different in-text citation styles, the most common method is to use a number to refer to your sources. The references at the end of the paper will then be listed in the order in which they appear in the text.

*Example:* Oscillation in the reaction of benzaldehyde with oxygen was reported previously.¹ Further oscillations were reported to be very systematic.²

References

**Journal article: General format**

Author, A. A; Author, B. B. Article Title. *Journal Abbr.* Year, volume, pagination.

*Note:* In ACS style, all journal titles are abbreviated according to the [Chemical Abstracts Service Source Index](https://www.chem Abstracts.com) (CASSI). Article titles are not required in citations, but are considered to be “highly desirable”.

**Single author**

**Multiple authors**

For 2-10 authors, list all names. For 10+ authors, list the first 10 followed by a semicolon and “et al.”

**Journal article found online**

Newspaper/Magazine article

*Note:* The periodical title is spelled out in its entirety for newspaper/magazine articles.

Web Site: General format

Author, A. A. (if any) Title of Home Page/Web Site. URL (accessed Month Day, Year), other identifying information (if any).

Website without an author

Documents retrieved from institutional or agency web sites

Book: General format

Author, A. A.; Author, B. B. *Title*, Edition Number (if any); Series Information (if any); Publisher: Place of publication, Year; Volume Number (if any), Pagination.
